

VizZle 4.2 Release Notes

New Functionality and Features

Celebrations & Reinforcers

- Added five new celebration animations for end-of-activity rewards.
- Added six new reinforcer animations for in-activity rewards.

Goal Creator & Reporting

- Created a new section, Reporting, which contains the new reporting tool and the existing Goal Creator tool.
- Added archiving functionality to the Goal Creator tool. IEP goals/objectives can be archived and the user can generate a report from archived data.
- Redesigned the reporting tool which includes the following functionality:
 - Replaced the reporting options with the intuitive Reporting Criteria interface, for easy custom report generation.
 - Report data is displayed in table and graph formats simultaneously. In the data table, columns can be hidden from view. In the line graph, the user can zoom into a section for a detailed view.
 - Report can be exported in either PDF or CSV format.

Lesson Sets

- Implemented Lesson Sets in the Share library. Lesson Sets are collections of Share lessons which teach specific social or Common Core-related skills. [Click here](#) to read more about Lesson Sets.
- Added functionality for individual lessons to be copied from a Lesson Set.
- Added functionality for Lesson Sets to be searchable in Share.

Notifications

- Added an in-app notification system so notification popups can display after user login.

Pix2Go

- Added a background color option so the user can set the background color for the entire page.

Share

- Updated the subject classifications for all lessons so they reflect the Common Core State Standards.
- Updated search functionality to include new classifications.

VizZle Gold

- Implemented VizZle Gold rating system. VizZle Gold rating has been added to lessons in the Share library. These lessons have been identified by the VizZle Moderators as being exceptional in content and quality. [Click here](#) to read more about VizZle Gold.
- Added functionality for VizZle Gold lessons to be searchable in Share.

Improvements

Game

- Improved game experience by adding a noticeable glow animation on the destination tile so the user recognizes which tile to move to.
- Added functionality for single-play mode, so an individual user can play a game lesson.
- Adjusted functionality so each player has to select a different token piece; duplicate tokens had caused confusion.

Landing Page

- Adjusted the “What’s New” cover flow so when a lesson tile is clicked on, it first shuffles to the front for viewing, instead of launching into play mode.

Lessons

- Redesigned lesson icons to have a cleaner, more streamlined look.
- Updated lesson names by removing “Board” from their titles.
- Improved the End of Activity Reward drop-down menu in lessons with Advanced Options. The drop-down now automatically expands to accommodate rewards with long names.
- Removed “Reader” data field in lesson details.
- Removed the unnecessary horizontal scroll bar in the subject area of Activity Summary.

Login

- Improved design by having the username text box pre-selected, so the user does not have to click on it before typing.

Media

- Improved the design of the Import Media popup by moving the Import button from the upper left to the lower right.

Popups & Quizzes

- Added functionality for popups/quizzes to open when the user double-clicks on hotspots in lesson edit mode.

Schedule

- Added functionality so activity text scrolls back to the beginning when a new activity is added.
- Improved preview layout (in Review and Print) by adding borders around sections to create visual separation.

Student Management

- Improved the error message displayed when there is a delivery failure for the email notification after a new student has been created.

Fixes

Game

- Fixed bug which caused VizZle to stall if the user landed on a special tile (for example, Lose a Turn, Spin Again, etc.) that also had a popup or quiz attached to it.
- Fixed bug in which a destination tile remained enlarged in Review, after the user had played the game in Preview and clicked the Back button.
- Fixed title header in special tile popups by removing “Quiz.”

Goal Creator

- Fixed bug which caused the buttons on the Goal Creator page to be disabled when “Expand All” was clicked.

Phonics

- Fixed bug in which the user’s correct answer from a Fill-in-the-Blank quiz appeared in the following Fill-in-the-Blank quiz.
- Fixed bug in which the user was able to replay a completed quiz repeatedly.
- Fixed bug in which media and quiz pages were blank in lesson printout.

Popups and Quizzes

- Fixed bug in the Fill-in-the-Blank quiz in which the incorrect answer in the text box was not automatically cleared after the red “X” displayed.

Playlist

- Fixed bug in which changes in the playlist’s lesson order would not hold after saving.
- Fixed bug in which the window for a digital timer activity in a playlist appeared blank and stretched.

Printing

- Fixed bug which caused the user to get stuck on the print popup after a print request to Microsoft XPS Document Viewer was cancelled.

Recycle Bin

- Fixed bug in which recycled lessons reappeared after a new lesson was created.

Schedule

- Fixed bug in which the end of activity rewards did not play in full-screen.
- Fixed bug in which the numbering of an ordered list of activities restarted from “1” on each new page.
- Fixed bug in which the the text of multi-line activities were overlapping.

Search

- Fixed bug which caused an error message to be displayed when the user searched with only the Images, Audio, and/or Video filters checked.

Share

- Fixed bug which removed subject classifications from the original Share lesson when the lesson was copied to one of the user’s folders.

Timer

- Fixed bug in which the custom celebration video played with no sound if a separate audio file was added as a completion sound.

VizZle Player

- [iPad and Android] Fixed bug in which certain popups appeared as text on top of the screen.
- [iPad and Android] Fixed bug in which text “OK” appeared after a Timer with no completion sound played.
- [iPad and Android] Fixed bug in which the title text in a Sorting lesson overlapped the “Sound on” checkbox.
- [iPad] Fixed bug in which duplicate My Lessons links appeared in the breadcrumbs trail when the My Lessons folder was tapped repeatedly.
- Fixed bug in which another lesson automatically played after the user completed a lesson in “Student Select” mode.
